

For this product vannamei prawns are used. Vannamei prawns are originally from Central and South America. They largely replaced native *Penaeus monodon* in Asia as the most farmed shrimp. They are more resistant to disease and there are more harvests in a year. Vannamei live in tropical marine habitats.

Product information

Scientific name	<i>Litopenaeus vannamei</i>
Origin	From aquaculture in Indonesia, Thailand, Vietnam, China, India
Composition	60% prawns and 40% brine
Size	40-60 pcs/lb; 60-90 pcs/lb (Super); 100-120 pcs/lb
Treatment	Cooked and peeled
